Systema Software Selected by Brentwood Services Administrators

SIMS Claims Chosen for Modern Platform, Cutting-Edge Technology, Sophisticated Reporting, Robust Functionality, as well as Flexibility and Scalability

Larkspur, CA – July 29, 2013 – [Systema Software](#), a leading provider of [claims administration software](#) and services to the insurance industry, today announced that Brentwood Services Administrators Inc. has selected [SIMS Claims](#)[™] for its workers’ compensation division.

For more than 20 years, Brentwood Services Administrators has been recognized as a leader in workers’ compensation claims administration. It has a proven track record of helping clients reduce claims costs by providing total injury management to employers and employer associations with self-insured and primary workers’ compensation programs. It works closely with clients to promote early return to work and to fight fraud. Brentwood Services also recently expanded its expertise to liability claims administration.

Eryn Crawford, Senior Vice President of Claims at Brentwood Services Administrators, commented on the new [claims system](#): “We selected [SIMS Claims](#) for our growing TPA because of its cutting-edge technology and outstanding reporting capabilities. We were surprised during the selection process to see how many systems were still using old technology platforms, similar to what we had for 15 years and were looking to replace. We found SIMS to be modern, well designed, and intuitive. We’re excited to begin using [SIMS](#), as it’ll make us better, stronger, and faster than ever.”

Steven Woods, Director of IT at Brentwood Services, added: “We were looking for a modern [claims system](#) with technological innovations that could improve efficiencies for staff and

clients, especially in terms of secure web-based access to information. SIMS is built on a .NET framework and leverages SQL Server Reporting Services and Integration Services, which we already have in place, so its underlying technology is a perfect match for our IT environment. [SIMS](#) is highly scalable, so it will meet our needs now and into the future. Systema also stands behind its product in terms of investing in SIMS development, continually making enhancements that deliver additional value to the overall customer base.”

[Jose Tribuzio](#), CEO of [Systema Software](#), commented on the new client: “As a leading TPA, Brentwood Services has a culture of innovation and a forward-thinking strategy. Our [SIMS Claims system](#) will provide Brentwood with advanced features and functionality, including flexible business rules to automate workflow and dashboard-driven processing to efficiently manage adjuster caseloads. These next-generation capabilities will further strengthen Brentwood’s coordinated, proactive approach to cost containment and loss control.”
