SIMS Claims Successfully Implemented at Seven State Property and Casualty Insurance Guaranty Associations

IGA's Benefit from Accelerated System Performance, Robust Functionality and Flexibility
to Accommodate Diverse Claims-Handling Needs

Hartford, CT, February 22, 2017 – Insurity, a leading provider of core insurance processing and data integration and analytics solutions, announced that seven state property and casualty insurance guaranty associations (IGAs) – in North Carolina, Georgia, Indiana, Wisconsin, Oklahoma, Mississippi and Arkansas – have all successfully completed implementation of SIMS Claims™ to manage claims for various lines of property and casualty insurance. The system is hosted via the reliable, secure and high-performing SIMS Cloud environment.

Jose Tribuzio, Senior Vice President and General Manager of the SIMS Claims product line at Insurity, commented, "We're thrilled that SIMS Claims is now in production at these IGAs. SIMS Claims is designed to deliver superior performance, robust claims-handling features and the flexibility to accommodate each IGA's unique needs, while simultaneously meeting the needs of the group as a whole."

Brian Mack, Vice President of Sales & Marketing of the SIMS Claims product line at Insurity, added, "Each state IGA has its own claims-handling operation, but they teamed up to implement the same claims system and share the cost of making the claims system uniform data standard (UDS) compliant. Due to this collaborative arrangement among the IGAs, they achieved tremendous value for all, as well as putting in place a structure for other IGAs, which choose to join this group of seven IGAs, to benefit from implementing SIMS. For those IGAs with SIMS in place, they're already starting to take advantage of workflow management capabilities to optimize efficiency and enhance productivity for claims adjusters, as well as business intelligence tools that monitor key performance metrics."

SIMS Claims is an innovative, award-winning claims administration system, which is highly praised by clients and well recognized by industry experts as a leading claims solution. This product line was recently acquired by Insurity, Inc. With advanced technology accompanied by superior customer service, SIMS Claims has experienced phenomenal success in the market. The SIMS Claims product team will continue to focus on developing, innovating and supporting SIMS as a leading claims management solution.
