Systema Software's SIMS Claims Rated Top Claims Administration System in 2013 RMIS Review

SIMS Claims Receives Overall "A" Grade with A+'s in Scalability and Workflow

Larkspur, CA – June 17, 2013 – [Systema Software](#), a leading provider of [claims administration software](#) and services to the insurance industry, today announced that [SIMS Claims](#)[™] has been rated the top [claims administration system](#) in the 2013 RMIS Review.

The RMIS Review (Review) was written by David Tweedy, CMC, RMIS Director at Bickmore, and published by Advisen. The primary goal of the Review is to provide readers with information on the most significant risk management information systems. It's a comparison of the "best of the best" systems on the market, and its ratings are based on David Tweedy's opinions and his study of the systems, vendors, user feedback, and each vendor's self-rating in key areas of functionality.

[Jose Tribuzio](#), CEO of [Systema Software](#), commented: "The RMIS Review's rating of [SIMS Claims](#) is more testimony to our strategy. Our mission has always been to deliver the best [claims solution](#), accompanied by superior support. We're thrilled that SIMS Claims was rated as the top [claims system](#) in the Review—with particularly high ratings in scalability (A+), workflow (A+), and system logic (A). This assessment speaks to our next-generation design, elegant user experience, and robust set of out-of-the-box features and functions."

"In the Review, we also received high ratings from our clients in terms of service and support," said Brian Mack, vice president of marketing and sales at Systema Software. "SIMS Claims is a relatively new entrant to the [claims software](#) market, but we've quickly earned a strong competitive position due to our track record of customer satisfaction and praise. Client feedback

indicated that they not only appreciated our product's ease of use and analytic capabilities, but also our help desk support, which provides rapid response and personalized communication to serve their need.”

With [SIMS Claims](#), organizations can leverage a modern platform and extreme system flexibility to support changing business needs, growth and expansion, and competitive differentiation. Organizations have leveraged SIMS workflow, automation, and business intelligence tools to achieve greater efficiency, focus, and savings.
