Systema Software Selected by Republic Capital Claims Administrators

SIMS Claims Provides Fast Go-to-Market Solution for TPA Serving California Workers' Compensation Market with Highly Experienced Claims and Management Staff

Larkspur, Calif. – September 30, 2015 – [Systema Software](#), LLC, a leading provider of [claims administration software](#) and services to the insurance industry, today announced that [Republic Capital Claims Administrators](#), Inc. has selected [SIMS Claims](#)[™] to support its California workers' compensation (WC) claims administration services.

[Republic Capital Claims Administrators](#) (RCCA) is a third-party administrator (TPA), designed and driven by executives with in-depth expertise in the California WC market. The executive team has worked at and helped manage many large, national TPAs. After seeing many TPAs undergo mergers, acquisitions, and national expansion, they decided to form RCCA to bring back the personalized service that many of today's small- to mid-sized California companies lack but desperately need.

[Jose Tribuzio](#), CEO of [Systema Software](#), commented, "We're thrilled to have the opportunity to work with [Republic Capital Claims Administrators](#). This entrepreneurial TPA has identified an underserved segment of the WC market, and they're taking an innovative approach by leveraging a powerful, configurable system like SIMS to meet the unique needs of their target market."

"In our assessment, Systema Software offered an industry-leading cloud-hosted solution, which would enable us to quickly implement and effectively scale to meet the needs of our customers," said [Byron Kerns](#), President and CEO of [Republic Capital Claims Administrators](#). "We looked at five different [claim systems](#), and SIMS Claims came out on top. SIMS is flexible and user

friendly, and it'll provide clients with extensive reporting and real-time data to manage their WC programs. SIMS will also help us interact on a personal level with our clients, sharing system information and communicating to achieve optimal savings and best-possible outcomes.”

[Brian Mack](#), Vice President of Sales & Marketing at [Systema Software](#), commented, “By leveraging SIMS Claims via our cloud platform, RCCA gains immediate access to a cutting-edge [claims system](#). They'll be able to rapidly extend their TPA services to the California WC market. As a fast and flexible go-to-market solution, SIMS provides the necessary workflow, automation, and compliance capabilities, so RCCA can facilitate a unique strategy for its customer.”

“RCCA executives have worked in California WC for 20 or more years,” said Kerns. “Small- to mid-sized self-insured entities have said that there's a gap in serving their needs. We've responded with a unique TPA offering that provides highly experienced claims staff and customized programs. In the past, it's been tough for organizations to grasp their program as a whole. Our total management approach, driven by SIMS data, will give clients a comprehensive understanding of their claims costs and empower them to improve program performance.”

About Republic Capital Claims Administrators, Inc.

[Republic Capital Claims Administrators](#), Inc., (RCCA) understands the California workers' compensation environment. Our management team has decades of experience in implementing and managing claims programs. In addition, our highly experienced claims professionals, claims management best practices, and state-of-the-art technology work to diligently mitigate costs at every level of the claims process and achieve the best possible outcomes.
