Systema Software Named to *San Francisco Business Times*' "Fast 100" List of Fastest-Growing Private Companies in the Bay Area

Systema Software's Growth and Success Driven by "Next-Generation" Design, Superior Customer Support, and Ongoing Innovation with Cloud and Mobile Solutions

Larkspur, CA – Oct 30, 2012 – Systema Software, a leading provider of claims administration software and services to the insurance industry, today announced it has been named to the *San Francisco Business Times*' 2012 list of 100 fastest-growing private companies in the Bay Area. The award recognizes companies that have experienced impressive revenue growth. Among the companies that made the list, Systema Software ranked no. 31. The company's success story includes posting 187 percent growth in revenue over the past three years, opening a second office in San Ramon earlier in the year, and an aggressive recruiting and hiring effort to more than double its staff in the coming year.

Jose Tribuzio, CEO of Systema Software, celebrates the award: "It's a tremendous honor to be recognized for our company's growth. It's been a team effort focused on our sole purpose—to deliver the best claims administration system to the market. Demand for our flagship SIMS Claims™ solution has grown because insurance companies, public entities, and risk pools are looking to replace legacy and first-generation claim solutions with a modern, high-performing and feature-rich claims management system—this is what they find in SIMS, the 'next-generation' of claims administration software."

Brian Mack, vice president of sales and marketing at Systema Software, commented on the company's success: "We have a nimble, entrepreneurial approach to the claims software market. In addition to the designed-to-perform architecture of SIMS that makes the system fast, flexible and stable, claims organizations have been highly receptive to our superior level of customer

service and support. They also appreciate our agile implementation process that enables them to quickly deploy the system and rapidly reap the benefits of our cutting-edge capabilities, including real-time graphical reporting, dashboard-driven processing, and seamless integration with Microsoft Word, Excel, and Outlook. More claims organizations are moving to the cloud and updating their e-business strategy. As such, there's been an increased demand for our SIMS Cloud and SIMS Mobile products, which put the power of claims data at our clients' fingertips through a reliable, secure, and high-performing claims solution."
