## **Systema Software and WorkersCompensation.com Enter Enterprise Agreement to Integrate Claims Software and Compliance Solutions**

*For Workers' Comp Clients, SIMS Claims Will Include Ongoing Compliance for Forms, Letters and Disability Rates as Part of Base Product*

**Larkspur, Calif. – November 3, 2014** – [Systema Software](#), a leading provider of [claims administration software](#) and services to the insurance industry, and [WorkersCompensation.com](#), the original and largest [workers' compensation compliance](#) center, today announced an enterprise agreement to integrate FlashForm SSL and CompGuide XML into the SIMS Claims™ base product.

[Jose Tribuzio](#), CEO of [Systema Software](#), commented: “In workers’ compensation, compliance changes occur every day across the nation, so it’s vital that organizations have access to the most current information. Our enterprise agreement with [WorkersCompensation.com](#) will provide our workers’ comp clients with jurisdictional form and disability rate updates on a near real-time basis. [WorkersCompensation.com](#) is without a doubt the largest and most utilized online WC compliance resource in the nation, and our companies are well aligned in terms of our commitment to and depth of knowledge of the workers’ compensation claims industry.”

[Robert Wilson](#), CEO of [WorkersCompensation.com](#), added, “We’re excited to work with [Systema Software](#) in our first enterprise agreement with a claims software vendor. Systema offers a modern and sophisticated claims solution in [SIMS Claims](#), which has already been integrated and deployed with our compliance solutions. As such, we have a track record of

combined implementation, successful results, and satisfied customers. SIMS has a reputation for providing in-depth functionality and flexibility. By integrating [FlashForm SSL](#) and [CompGuide XML](#), SIMS solidifies its position as a leading workers' compensation claims solution in the market.”

Since 2000, [WorkersCompensation.com](#) has provided industry professionals with reliable, timely information and updates for ongoing workers' compensation claims compliance. [FlashForm SSL](#), its cloud-based library, includes 3,500 jurisdictional forms that are continually updated. By integrating with FlashForm SSL, [SIMS Claims](#) users will have immediate access to over 820 forms and can elect to enable other forms from this extensive library, so fields can be auto populated with claims data, and forms and letters can be saved to the claim file.

[CompGuide XML](#) maintains the latest disability rates for all jurisdictions and uses a benefit rules engine to calculate benefit payments—such as temporary total disability, temporary partial disability, permanent partial disability, and permanent total disability benefits. From within SIMS, CompGuide XML disability rates and payment calculations will be readily available to facilitate and streamline this critical component of the claims process.

### **About Systema Software**
