Systema Software Announces Recent Addition of 10 New California Public Entity Customers

Solidifies SIMS Claims as “Solution of Choice” Among Public Entities

Larkspur, Calif. – February 6, 2015 – [Systema Software](#) today announced the recent addition of 10 California public entities to its client base. These entities all selected [SIMS Claims™](#) as their new [claims management software](#). Some of the entities include:

- City of Sacramento
- Tulare County
- Stanislaus County
- Fresno County
- County of Madera
- Mendocino County
- San Mateo County Schools Insurance Group
- County of Sonoma

[Jose Tribuzio](#), CEO of [Systema Software](#), commented on the addition of these clients: “In the past year, many public entities grew tired of their legacy systems, which lacked a modern platform, contemporary claims-handling capabilities, and the flexibility to accommodate changing business needs. [SIMS Claims](#) represents the next-generation of [claims management software](#). It has a proven track record of empowering public entities through its innovative design, enhanced system performance, and a robust set of features and functions to manage claims with increased power, speed, and intelligence.”

[Brian Mack](#), Vice President of Sales & Marketing at [Systema Software](#), added: “We want to serve as the leading [claims software](#) provider for public entities across the nation. Being selected by these entities is an indicator we’ve made significant strides in achieving this objective. Public entities set the bar high when it comes to criteria for a [claims solution](#), and they want a vendor who is committed to the market. These organizations often perform an in-depth market analysis and extensive RFP process in order to arrive at their final system selection. We’re thrilled so many public entities determined [SIMS Claims](#) met their rigorous set of business and system requirements, including superior customer service and support.”

[SIMS Claims](#) customers experience increased efficiency and productivity in their claims operation, as well as obtain additional value through a cloud-hosted option, asynchronous business rules for speed and performance, seamless integration with Microsoft Office, dashboard-driven processing, mobile claims capabilities, business intelligence tools, and advanced features such as Claims Summary and Plan of Action, which help examiners stay focused on tasks that truly impact claims’ costs and outcomes.

About Systema Software
