CHSI Technologies and Systema Software Announce Strategic Alliance to Serve the Policy and Risk Pool Administration Market

Market leaders partner to bring industry leading solutions for policy administration and claims management to the insurance industry.

Provo, UT January 27, 2011 – CHSI Technologies, a premier provider of high value cutting-edge policy administration software and Systema Software, a leading provider of comprehensive workers' compensation, and property and casualty claims administration technology, announced that they have entered into a strategic alliance agreement. Under the alliance, both companies will work cooperatively with each other to deliver efficient integrated services to mutual clients. CHSI Connections® Management System and Systema's SIMS Claims Administration software, both Microsoft .Net browser-based solutions, provide a complete policy, billing, and claims administration system for commercial P&C and self-insured insurance programs.

The Connections Management System is the only software solution built by administrators, for administrators to simplify policy management. An affordable single interface system that is delivered through a web-based solution to manage multiple functions essential for business operations – rating and underwriting, policy administration, receivables management, contact management, claims integration and reporting. When asked the primary purpose of the partnership, Eric Robinson, COO for CHSI Technologies said, "Administrators are looking for business solutions that drive real value for their business and the clients they serve. Many of our clients manage claims operations and are looking for web-based claims administration system that can easily integrate with our policy administration solution. Systema was a logical choice based on the ability to provide the industry's leading expert for claims administration software delivered through the web."

As a comprehensive property and casualty claims management system, SIMS is designed to maximize efficiencies and profitability in the day-to-day operations of claims examiners, managers, underwriters and external clients. It provides all of the functionality needed to support claims operations, including a powerful toolkit for delivering high level configurability. Aaron Herrmann, Systema Software's Executive Sales Manager said, "Systema Software is very pleased to be working with CHSI Technologies. The CHSI Connections Management System represents cutting edge technology for the insurance industry, and we are proud to have them as a strategic partner."

About Systema Software
Systema Software provides flexible, comprehensive solutions and services to the insurance industry. Its flagship product, SIMS Claims, is an innovative, browser-based property and casualty claims administration system. Together, our team of Big 5 consulting veterans, experienced software developers, and project managers deliver an architecturally strong enterprise platform, designed for superior speed, scalability, and performance.
